Motorists driving to France warned about new emissions sticker system

Drivers of vehicles caught without anti-pollution stickers risk fines of up to £117

Paris, Lyon and Grenoble operating schemes already

The RAC is advising UK motorists driving to France to be aware of a new vehicle emissions sticker system which has been introduced in Paris, Lyon and Grenoble to tackle pollution.

The [Crit'Air](#) scheme, which came into force in Paris on Sunday 22 January, requires all vehicles – cars, lorries, motorbikes and buses – to display a windscreen sticker, or vignette, according to how much they pollute. Grenoble and Lyon introduced the scheme on 1 January.

Vehicles registered abroad will be allowed to drive in central Paris without the Crit'Air vignette until 31 March. Stickers cost around £3.20 each (€3.70) – or £3.60 (€4.18) including postage, and come in six categories ranging from the very cleanest (Crit'Air 1) – electric or hydrogen-powered vehicles – to the dirtiest (Crit'Air 6).

The penalty for failure to display a sticker while driving in Paris is an on-the-spot fine of between €68-135 (£58 to £117). The categories correspond to the six European Union emission standards for cars – dating back to 1992 when Euro-1 was introduced.

[RAC European breakdown](#) spokesman Simon Williams said: “Anyone caught without a sticker risks a fine of up to £117, although we understand the

French police are likely to be lenient in the early days. While the stickers only cost around £3.20 to buy, the website is currently only in French. An English-language site is, however, due to be in operation as of 1 February.”

In order to apply for a sticker online drivers will need to know the European Emissions Standard of their vehicle – this can be quickly [checked on the RAC's website](#). For newer vehicles, covered by Euro 5 and Euro 6 standards, the information you need may be found in section D2 of your DVLA V5C registered keeper form. For older vehicles motorists will need to find out when your vehicle was manufactured and check it with the emissions bands on [this webpage](#).

Ultimately, those vehicles with the highest emissions face not being allowed to drive in the city on days where pollution is particularly high. In the future vehicles may be banned from driving in Crit'Air areas on certain days based on which sticker have, or which emissions category they fall into.

Certain vehicles have not been assigned a category and are therefore unable to drive in Paris between 8am and 8pm, Monday to Friday. These are typically older models, such as cars registered before 1997, motorbikes and scooters from before June 2000, and trucks and buses from before 2001. Based on the pre-1997 criteria, the RAC understands that one in 10 (9%) French vehicles are too old to get a sticker.

As a result the new system has not gone down well with certain groups – none more so than classic car enthusiasts, around 100 of whom have staged a motorcade of vintage vehicles in protest, under the banner: 'No to Crit'Air, No to Big-Broth'Air'.

Somewhere in the region of 600,000 vehicles are driven in the French capital every day and pollution has been so severe on occasions that the authorities have banned vehicles from driving in the city based on whether their number plates are odd or even. Paris, along with Madrid, Athens and Mexico City also have wider plans to ban all diesel vehicles from the city by 2025.

A total of 22 other towns may decide to do the same by 2020:

Avignon	Faucigny, Glières, Bonneville
---------	-------------------------------

Arras	Lille
Annemasse	Le Havre
Bordeaux	Montpellier
Cannes	Reims
Clermont-Ferrand	Rouen
Champlan	Saint-Etienne
Côte Basque-Adour	Strasbourg
Dunkerque	Saint Maur-des-Fossés
Dijon	Toulouse
Epernay	Vallée de la Marne

More information (currently in French) about the scheme can be found on the [Crit'Air website](#).

About the RAC

With more than eight million members, the RAC is one of the UK's most progressive motoring organisations, providing services for both private and business motorists. Whether it's roadside assistance, insurance, buying a used car, vehicle inspections and checks, legal services or up-to-the-minute traffic and travel information – the RAC offers a solution for all motoring needs. The RAC is committed to making motoring easier, safer, more affordable and more enjoyable for drivers and road users.

The RAC is the motorist's champion and campaigns to support the interests of its members and UK motorists at a national level, including advancing levels of road safety, supporting the needs of young drivers and voicing concerns about the increasing cost of motoring. The RAC's annual [Report on Motoring](#) – first published in 1989 – provides a clear insight into the concerns and

issues facing today's motorists.

For the very latest news on UK fuel prices, check [RAC Fuel Watch](#) or follow [#racfuelwatch on Twitter](#). This is a comprehensive guide to the latest UK unleaded petrol and diesel prices – both at the wholesale level and at the pump. RAC Fuel Watch analyses how prices changed through the previous month and compares the most recent prices with those from three, six and 12 months before.

Key facts:

- RAC patrols fix four out of five vehicles at the roadside and on average within 30 minutes
- RAC vans carry more than 500 parts and tools to get members' vehicles going again
- 92% of members would recommend RAC Rescue to their friends and family
